

ALSHIMAA MOHAMED

Front end Developer

Egypt - Sohag • (+20) 1149121885 • alshimaa717@gmail.com
[Portfolio](#)

SUMMARY

Passionate front-end developer with strong experience in building responsive web applications using React, Tailwind, and Next.js. Proven ability to deliver high-quality projects with clean code, user-focused design, and modern authentication systems. Committed to continuous learning and excited to contribute to innovative development teams.

PROJECTS

Bookwise [↗](#)

- Full-stack website showcase a collection of computer science books, you can read a brief summary of each book and even borrow it!
- The website is fully responsive and works on all screen sizes. Each user has their own profile and personal data stored in the database.
- You can explore the site by logging in with this demo account:
- Email: user@example.com Password: 123456789
- Or sign up with your own email to experience the full authentication flow, including email verification

E-commerce website [↗](#)

- built using the React framework, designed to replicate a real-world online shopping experience. The application includes 11 pages and covers all essential functionalities of a modern e-commerce platform.

Key Features:

- Product Listing Page: Displays a dynamic grid of products pulled from mock API data.
- Product Details Page: Showcases detailed information about each product with images, description, and price.
- Shopping Cart: Users can add and remove items, update quantities, and view total price in real-time.

Space Tourism [↗](#)

- Multi-page space tourism website using React-Router and tailwind . users are able to view each page and be able to toggle between the tabs to see new information and view the optimal layout for each of the website's pages depending on their device's screen size.

Interior Design [↗](#)

- A landing page using only tailwind for an Interior design company that wanted to share their projects to their customer and showcase their massive portfolio, the website is fully responsive .
-
